Training at Aston, PA hosted by:

205 Bridgewater Rd. Aston, PA 19014

Qualified Inspector 3

Oct. 24 & 25th 2023

7:30 AM - 4:00 PM

\$995 per person

This 2-day inspection program is a comprehensive study covering periodic inspection criteria and techniques for slings, rigging hardware and below-the-hook lifting devices as described in OSHA 1910 & 1926, ASME B30.9, B30.10, B30.20 and B30.26 along with manufacturer requirements. The participant will gain the knowledge of sling and rigging hardware types, their correct applications, and to identify correctly fabricated sling assemblies. This is all part of the education process to developing one's ability to confidently identify sling and hardware defects and failures, along with the probable causes of identified defects and failures.

Attendees will participate in the hands-on inspection of (field damaged) synthetic webbing slings, round slings, wire rope slings, alloy chain slings, wire mesh slings, rigging hardware and below-the-hook lifting devices. You will find that Qualified Inspector (Level 3) is the most empowering and relevant sling and hardware inspection course available today.
